New Mission Statement

The Criminal Justice team coordinates resources to meet the substance abuse and criminogenic risks and needs of persons in the criminal justice system of Lancaster County.

A person or agency identifies an issue, gap or opportunity that the team then hears about and helps coordinate a response to it. The team is also a forum for people to talk about what they see happening. It is similar to the Family Violence Council and the Emergency Services Coordinating Council.

People to Bring to This Table

There is a list of criminal justice people and treatment people. Otto will send everyone here his list and ask them to add names from criminal justice to it.

Other News

The crime commission is working to put the Simple Screening Instrument (SSI) on Criminal Justice Information System (CJIS).
